The Tony Rice Unit at the Harrisburg Forum

“Ice Cold Bluegrass Featuring The Tony Rice Unit”

Harrisburg, PA. Central Penn Productions was recently contracted to provide production services for the Tony Rice Unit at the Harrisburg Forum, sponsored by Sound Effect Entertainment. The night included opening acts, Colebrook Road, Brian Labs and the Van Wagner & Matthew Harrison Duo. FOH consisted of 4 SoundBRIDGE 5215's and 4 PAS CB-2's mixed on an Allen & Heath GL2200. The audience was entertained throughout the entire evening by bluegrass and folk music in a venue with production quality that is sure to keep them coming back.

**NEXT MONTH: FCC Officially Bans
Use of 700MHz Band**

Community I/O Series Speakers

The I/O Series speakers from Community provide high quality audio in an indoor/outdoor enclosure while holding true to the sonic clarity you would expect for a playback or paging system. Black and white finishes are available on the two models I/O5(T) and I/O8(T) that contain a 5" and 8" low frequency driver respectively and are available for both 8ohm and 70Volt operation. The Community I/O Series speakers continue to be a favorite installation model for various applications of the CPP staff.
